INTRODUCTION

Agriculture plays a significant role in sustaining our economy. A majority of the rural population is fully or partially earning from this sector. With better planning and increase in per acre yield, we can depend on it for poverty alleviation. In this context, Crop Reporting Services makes it utmost effort to provide credible and timely data for the Researchers, Planners & Policy makers. The book in hand "Crop Statistics 2013-14" is the routine annual publication of the Department.

The book is divided into two distinctive chapters. The chapter one contains general data on pertinent agriculture related subjects whereas Chapter two is purely reserved for crops acreage, production and its behavioral analysis over the last year, backed up with necessary graphics and pictorial presentation.

I am extremely grateful to Mr. Muhammad Humayun Khan, Secretary Agriculture, Khyber Pakhtunkhwa, who extended full moral support and expertise at every stage.

I also appreciate the efforts of Mr. Attaullah Khan, Computer Operator, who extended tremendous help in composing the final draft at shortest possible time.

Comments / Suggestions, if any, for improvement in the publication would be welcomed.

December, 2014.

(MAQSOOD-UR-RAHMAN)

DIRECTOR
CROP REPORTING SERVICES
AGRICULTURE DEPARTMENT
KHYBER PAKHTUNKHWA

CHAPTER-1

(General Data 2013-14)

CONCEPTS AND DEFINITION USED IN CROPS ESTIMATION SYSTEM**VILLAGE:**

It is a Revenue estate, which has defined boundaries on the ground and separate revenue records, including cadastral map is maintained for it.

KHASRA:

A pieces land with definite permanent boundaries has been assigned with a specific number in the cadastral map is known as Khasra Number. The record maintain in the Register is called Khasra Register. The crop area statistics collected by the patwari are recorded in a register known as Khasra Register.

GIRDAWARI:

The crop area statistics collected by patwari on the basis of complete count of operational holdings called Girdawari.

QANUNGO:

The work of patwari is supervised by immediate officer called Qanungo.

CADASTRAL SURVEY:

The complete survey of all the Khasra Numbers of a village with the help of Cadastral Map is called Cadastral Survey.

JINSWAR STATEMENT:

After completion of entries for each survey number of the village, an abstract of area sown under different cops is prepared, which is called Jinswar Statement. The results of cadastral survey consolidated on tehsil and district basis during each vegetative season (Kharif + Rabi) is called Jinswar Statement.

AGRICULTURAL YEAR:

Agricultural year starts from the month of July (Kharif Season) and ends next year in the month of June (Rabi Season).

MIXED CROP:

A number of crops grown on the same land in the form of mixture are called Mixed Crop.

CROPPING PATTERN:

System of growing different crops in a particular season is called Cropping Pattern.

SAMPLING DESIGN:

List of sampling units with their identification particulars and pre-assigned probability of selection.

SAMPLING FRAME:

List of sampling units along-with their identification particulars.

SAMPLING UNIT:

The smallest units which can be identified and are used for drawing samples and on which observations can be recorded.

POPULATION:

The population is collection of all sampling units which possess certain characteristics as per the objectives of the survey.

MARKETABLE GRAIN:

The weight of the harvested grain which can be sold in the market after drying is called Marketable Grain.

GINNING:

It is a process of separating lint of cotton from its seed.

CROP CUTTING EXPERIMENTS:

It is a technique of selecting random plot of a given size in the field of a specified crop and harvesting its produce by following specified methodology.

OPERATIONAL HOLDING:

An operational holding is defined as a techno-economic unit wholly or partly for agricultural production and operated by one person along or with the assistance of others, without regard to title, size or location.

HOUSEHOLD:

A household is a group of persons normally living together and taking food from a common kitchen.

FARM:

It is the aggregate area of land operated by member (s) of one household alone or with the assistance of members (s) of other household (s) without regard to location, size or title and normally used for agricultural production. Farm wholly uncultivated during the census year are also included in this category.

INDIVIDUAL FARM:

It means a farm operated by one or more persons of the same household.

JOINT FARM:

It means a farm jointly operated by persons belonging to two or more different households.

CULTIVATED AREA:

It is that farm area which was sown at least once during the year under report or for the year before. It is the sum of area Net Sown and Current Fallow.

NET SOWN:

It is that cultivated farm area which was actually cropped during the year under report regardless of the number of crops raised and includes area under Fruits trees for the same year.

CURRENT FELLOW:

It is that cultivated farm area which was cropped neither during the census year nor in the year before that.

NOT AVAILABLE FOR CULTIVATION:

It is that uncultivated area of the farm which is under home-stead, farm roads and other concern purposes. Therefore, it is not available for cultivation.

FOREST AREA:

It is that uncultivated farm area which is under Forest.

CULTURABLE AREA: -

It is the sum of cultivated and culturable waste land.

CROPPED AREA: -

It means the aggregate area of crops raised in a farm during the census year including the area under fruits trees.

IRRIGATED AREA:

It includes that cultivated area, which is actually irrigated at-least once during the year under report by artificial means.

BARANI AREA:

It is that cultivated area which is not fit with any source of irrigation and entirely depends upon rains water. It includes the area flooded or that area which gets moisture from rivers through soil percolation.

INTENSITY OF LAND USE:

Represents the cultivated area measured in term of total culturable area multiplied by, 100 i.e.

$$\text{Intensity of land use} = \frac{\text{Cultivated Area} \times 100}{\text{Total Cultivable Area}}$$

It indicates the extent to which the culturable land was used for production.

INTENSITY OF CROPS: -

Represent the total cropped area in term of total cultivated area multiplied by 100 i.e.

$$\text{Intensity of Cropping} = \frac{\text{Total Cropped Area} \times 100}{\text{Total Cultivated Area}}$$

It indicates the extent to which the cultivated area was used for cropping.

CLASSIFICATION OF CROPS

Group	Kharif	Rabi
Food / Cereal	Maize, Rice, Bajra & Jowar	Wheat & Barley
Oilseed	Cotton, Groundnut, Sesamum, Soybean, Sunflower & Caster-seed	Rape & Mustard, Sunflower & Linseed
Pulses	Mung, Mash, Arher & O. Pulses	Gram, Masoor, Matter, O. Pulses
Condiments	Chilies, Turmeric,	Garlic, Coriander, Ginger, , Onion,
Cash/ Commercial	Cotton Sugarcane, Sun hemp, Guara & Jute	Tobacco & Sugar beet
Horticulture	Vegetables, fruits & Fodders, Potato	Vegetables, fruits & Fodders, Potato

CHAPTER-2

(District-wise Crop Data for 2013-14)

KHARIF CEREALS

(Maize, Rice, Bajra, Jowar, Ground Nut, Seasmum)

MAIZE AREA & PRODUCTION FROM 1975 TO 2014 (5 YEARS AVERAGE)

MAIZE**A. Area (Hect:)**

2012-13	2013-14	%age change over last year
463409	470877	(+) 1.61

Reason for change:

- ❖ Adequate moisture availability at the time of sowing.
- ❖ Timely availability of improved hybrid seed at all Model Farm Services Center established by the Government.
- ❖ Attractive Market price of the produce (Grain + stalks).
- ❖ Improvement in water availability and its usage system from CRBC, D.I.Khan.

B. Production (Tonnes):

2012-13	2013-14	%age change over last year
858338	914835	(+) 6.58

Reason for change:

- ❖ Corresponding change as a result of improvement in size of Area.
- ❖ Receipt of rains with normal intensity and proper interval through out the season.
- ❖ Timely sowing of the Crop.
- ❖ The two spell of rains the First one in middle of September and the next in last week of October put positive impact on yield of the crop.
- ❖ Better management of the crop due to timely availability of inputs and attractive market value of the out put.
- ❖ Promotion of Foliar Fertilizer NPK by the concerned Government Organizations.
- ❖ High temperature and poor pollen Fertilization during 2012-13, reduced yield of the crops. This also caused relative increase in yield over the last year.

BAJRA (Millet)**A. Area (Hect:)**

2012-13	2013-14	%age change over last year
4087	3095	(-) 24.27

Reason for change:

- ❖ Shift of Area to other major crops that are comparatively more profitable in the market.

B. Production (Tones):

2012-13	2013-14	%age change over last year
2412	1970	(-) 18.33

Reason for change:

- ❖ Corresponding change as a result of decrease in Area.
- ❖ However, timely receipt of rains and favorable weather condition during the season increased yield of the crop and reduced drastic reduction in Area.

MASH**Uses:**

- ❖ Eaten boiled or cooked in various forms.
- ❖ Its plants are best source of animal feed.
- ❖ It is best nitrogen fixer which gives fertility to soil.
- ❖ It is used to reduce weight.

A. Area (Hect):

2012-13	2013-14	%age change over last year
1140	979	(-) 14.12

Reason for change:

- ❖ Diversion of land to other Kharif crops having better economic return.

B. Production (Tonnes):

2012-13	2013-14	%age change over last year
1073	1005	(-) 6.34

Reason for change:

- ❖ Corresponding change as a result of decrease in Area.
- ❖ However, timely receipt of rains and favorable weather condition during the season increased yield of the crop and reduced drastic reduction in Area.

KHARIF CONDIMENTS

(Chilies, Turmeric, Sunhemp, Kharif Vegetable, Soybean Kharif Fruits & Fodder)

CHILIES

**Uses:**

- ❖ Used in dishes.
- ❖ It controls sugar level in diabetic patients.
- ❖ Good source of Vitamins B & C, iron and potassium.

A. Area (Hect):

2012-13	2013-14	%age change over last year
415	426	(+) 2.65

Reason for change:

- ❖ Inclining trend in Area is due high demand of the crop.

B. Production (Tonnes):

2012-13	2013-14	%age change over last year
483	489	(+) 1.24

Reason for change:

- ❖ Corresponding increase in area.

SUNHEMP

**Uses:**

- ❖ Used to control weeds.
- ❖ Best source of protein & feed to animals in dried form.
- ❖ In early flowering stage it is used as green manure.

A. Area (Hect):

2012-13	2013-14	%age change over last year
5	5	0

Reason for change:

- ❖ It is a minor crop and shows no change.

B. Production (Tonnes):

2012-13	2013-14	%age change over last year
8	7	(-) 12.50

Reason for change:

- ❖ This is a routine fluctuation

KHARIF COMMERCIAL CROPS

(Sugarcane, Cotton, Guara)

SUGARCANE AREA & PRODUCTION FROM 1975 TO 2014 (5 YEARS AVERAGE)

SUGARCANE

**A. Area (Hect:)**

2012-13	2013-14	%age change over last year
106734	117379	(+) 9.97

Reason for change:

- ❖ Adequate water availability.
- ❖ Timely announcement of the support price of the commodity.
- ❖ Attractive Market rates of the Gur.
- ❖ Improvement in water availability and its usage system from CRBC, D.I.Khan.

B. Production (Tonnes):

2012-13	2013-14	%age change over last year
4770229	5361420	(+) 12.39

Reason for change:

- ❖ Corresponding change as a result of improvement in size of Area.
- ❖ Receipt of rains with normal intensity and proper interval through out the season.
- ❖ Timely sowing of the Crop.
- ❖ The two spell of rains the First one in middle of September and the next in last week of October put positive impact on yield of the crop.
- ❖ Better management of the crop due to timely availability of inputs and attractive market value of the out put.
- ❖ High temperature and poor pollen Fertilization during 2012-13, reduced yield of the crops. This also caused relative increase in yield over the last year.

COTTON

A. Area (Hect:):

2012-13	2013-14	%age change over last year
243	257	(+) 5.76

Reason for change:

- ❖ This can be attributed to the attractive market rate of the commodity.

B. Production (Bales):

2012-13	2013-14	%age change over last year
676	758	(+) 12.13

Reason for change:

- ❖ Corresponding increase in Area.

GUARA

**Uses:**

- ❖ Used as animal feed.
- ❖ Used as green manure to improve soil fertility.
- ❖ Its gel like substance is used in dairy products like ice cream, cheese and cold meat processing.
- ❖ Guara is also used in paper and textile industries.

A. Area (Hect:):

2012-13	2013-14	%age change over last year
1257	507	(-) 59.67

Reason for change:

- ❖ Conversion of land to other kharif crops having attractive market rate.

B. Production (Tonnes):

2012-13	2013-14	%age change over last year
1980	755	(-) 61.87

Reason for change:

RABI CEREALS

(Wheat, Barley, Rape & Mustered, Oilseed & Line Seed)

WHEAT AREA & PRODUCTION FROM 1975- TO 2014 (5 YEARS AVERAGE)

WHEAT

A. **Area (Hect:)**

2012-13	2013-14	%age change over last year
727253	776846	(+) 6.82

Reason for change:

- ❖ Receipt of adequate rains, especially in rain-fed zones of the Province.
- ❖ Good economic return with less labor and investment.
- ❖ Improvement in Law & Order situation.
- ❖ Sufficient availability of improved varieties of seeds by the Department through Farm Services Centers established in each district.

B. **Production (Tonnes):**

2012-13	2013-14	%age change over last year
1246703	1363119	(+) 9.34

Reason for change:

- ❖ Corresponding increase in Area.
- ❖ Agro-meteorological condition remained conducive throughout the season.
- ❖ Receipt of Intermittent rains at critical crop development stages.
- ❖ Timely application of Fertilizer.
- ❖ Timely sowing of the Crop.

RAPE & MUSTERED

A. **Area (Hect:)**

2012-13	2013-14	%age change over last year
18814	14032	(-) 25.42

Reason for change:

- ❖ The decrease is mainly due to receipt of rains at the time of sowing that motivated the farmers to grow more Wheat especially in tropical zones.

B. **Production (Tonnes):**

2012-13	2013-14	%age change over last year
8492	6887	(-) 18.9

Reason for change:

- ❖ Decrease in Area.
- ❖ Increase in yield as a result of favorable weather condition reduced the effect of reduction in Production.

GRAM

A. **Area (Hect:)**

2012-13	2013-14	%age change over last year
37887	39672	(+) 4.71

Reason for change:

- ❖ Good economic return with less labor and investment.
- ❖ Conducive environment in the tropical southern parts of the Province.
- ❖ Less moisture requirement of the crop.

B. **Production (Tonnes):**

2012-13	2013-14	%age change over last year
20099	22942	(+) 14.14

Reason for change:

- ❖ Corresponding increase in Area.
- ❖ Agro-meteorological condition remained conducive throughout the season.
- ❖ Timely application of Fertilizer.
- ❖ Timely sowing of the Crop.

MATTER**Uses:**

- ❖ Matter is used for cooking in number of ways in combination with other vegetables.
- ❖ It is one of the best nitrogen fixer in the soil.
- ❖ It contains vitamin C and proteins which helps to protect against stomach cancer.
- ❖ Besides, peas help to regulate blood cholesterol, sugar level and kidney disorder.

A. Area (Hect:):

2012-13	2013-14	%age change over last year
1365	1065	(-) 21.98

Reason for change:

- ❖ Conversion of area to Wheat and other Rabi crops having better economic return.

B. Production (Tonnes):

2012-13	2013-14	%age change over last year
905	715	(-) 20.99

Reason for change:

- ❖ The direct effect of downward trend in the Area.

CORIANDER (Dhanya)**Uses:**

- ❖ Coriander is largely used in sausages, flavor meat, fish and vegetables as the seeds are used as a spice.
- ❖ Ground coriander is used in curry powder and garam masala.
- ❖ It delay or prevent the spoilage of cooked food.
- ❖ Medicinally it is used in the relief of anxiety and stomach pain, control sugar in body and helps in breakdown of cholesterol in blood.

A. Area (Hect):

2012-13	2013-14	%age change over last year
196	177	(-) 9.69

Reason for change:

- ❖ This is a minor crop grown at a very limited Area in the central Khyber Pakhtunkhwa and in Mohmand Agency of FATA. Farmer's preference towards wheat has reduced its size.

B. Production (Tonnes):

2012-13	2013-14	%age change over last year
101	100	(-) 0.99

Reason for change:

- ❖ Decrease in Area.
- ❖ Increase in yield as a result of favorable weather condition reduced the effect of reduction in Production.

ONION

A. Area (Hect:)

2012-13	2013-14	%age change over last year
11119	11225	(+) 0.95

Reason for change:

- ❖ Attractive market rate
- ❖ Adequate water availability

B. Production (Tonnes):

2012-13	2013-14	%age change over last year
187479	191404	(+) 2.09

Reason for change:

- ❖ Corresponding increase in Area.
- ❖ Timely application of pesticides and fertilizer.
- ❖ Proper management of transplantation of nurseries.
